

Item No. 3
Halifax Regional Council
December 10, 2013

TO: Mayor Savage and Members of Halifax Regional Council

Original Signed by Director

SUBMITTED BY: _____

Jane Fraser, Director, Planning & Infrastructure

Original Signed by Director

Brad Anguish, Director, Community & Recreation Services

DATE: November 27, 2013

SUBJECT: Recreational Facilities Inventory

INFORMATION REPORT

ORIGIN

May 14, 2013 Motion of Regional Council,

“MOVED by Councillor McCluskey, seconded by Councillor Whitman that Regional Council request a staff report detailing the inventory of all recreational facilities including: recreational buildings, parks, sports courts, sports fields, trails and playgrounds. Further, that this inventory be represented geographically; and where possible, by asset, provide detail where district capital funds have been used to build the facility.

Councillor McCluskey clarified that the goal is to create an inventory to see what each district has for facilities when determining the needs around HRM.”

MOTION PUT AND PASSED UNANIMOUSLY.

LEGISLATIVE AUTHORITY

Halifax Regional Municipality Charter, Section 61, Section (5a)

BACKGROUND/DISCUSSION

The purpose of this report is to provide information to Council on the inventory of recreational facilities including recreational facilities, parks, sports courts, sports fields, regional trails and playgrounds as well as HRM Beaches and Outdoor Pools.

Asset Inventories

All relevant data from respective business units, along with HRM's GIS system, have been used to create the attached inventories. The data presented is the most up to date data at the time of creation. However, the data routinely changes due to numerous edits including property changes (i.e., disposal or acquisition of inventory) and data correction efforts. The new Enterprise Asset Management System is expected to have an inventory component that will assist in inventory accuracy in terms of real time changes. In addition, upcoming work on the Community Facility Master Plan will help to create a framework to assist in the rationalization and creation of new assets.

The inventories requested by Regional Council have been captured in the attachments. As requested, each asset category has been organized by districts. Recreation facilities are captured in Attachment A and include both those operated by HRM, joint facilities with Halifax Regional School Board and those operated by community groups. Since some parks and facilities may be known locally by different names than those formally recognized by HRM, the civic address of the assets has also been included. Further, Attachment B which outlines the inventory of parks also reflects the category of each park. Pursuant to HRM's Park Classification System included in the Regional Plan, each park has been defined by one of the following categories:

- Neighbourhood – Neighbourhood Parks are primarily designed to provide unorganized play activities for children, quiet seating or rest areas and/or linear linkages between other municipal parks or open spaces. These parks typically provide centrally located recreational services for neighbourhoods of 80 to 120 households.
- Community – These parks may be designed for organized youth and recreational adult level sports, but may also include facilities for play by children. These areas may also be designed for passive recreation and left in a predominantly natural state. Community Parks are primarily intended to serve the recreation needs of a community comprised of three or four neighbourhoods with a population in the range of 1200 persons.
- District – District Parks are primarily intended to serve the recreation needs of several communities with a population in the range of 10 000. District Park facilities may provide a range of recreational uses including, but not limited to, walking and cycling trail, sport fields, picnic areas, supervised beaches, and play facilities for children.
- Regional – The primary objective of a Regional Park will be to preserve and protect significant natural or cultural resources. The essential feature of a Regional Park may include, but not be limited to, open space, wilderness, scenic beauty, flora, fauna, recreational, archeological, historic or geological resources. A Regional Park will have sufficient land area to support outdoor recreational opportunities for the enjoyment and education of the public. The size of a Regional Park must be sufficient to ensure that its significant resources can be managed so as to be protected and enjoyed. Regional Parks may be federal, provincial, or municipal properties and are intended to serve the

educational, cultural, and recreation needs of the population of the entire region as well as for visitors to HRM.

The inventory of sports fields (Attachment C) does not include baseball diamonds which have been captured in Attachment D. Sport courts have been captured in Attachment E. Due to the current state of data, the specific usage type of each sport field as well as number of separate sport courts per site is not available. This information is expected to be able to be captured as further work on the data is completed. Additional attachments outlining Playgrounds (Attachment F), Regional Trails (Attachment G), and Outdoor Pools and Beaches (Attachment H) have been provided as requested.

District Capital Funds

HRM's financial system includes data related to the use of district capital funds for the fiscal years 2007/08 to 2012/13. Regional Council has requested that information related to the use of district capital funds used to support the installation and improvements to recreation assets also be presented. This assessment was complicated by the fact that the number and boundaries of the council districts was changed in 2012. This assessment was further challenged by the lack of detail included in the invoicing. Therefore, Attachment I outlines the capital district funds that were clearly used for recreation assets in the respective years. For the years prior to 2012, the data is collected for the former 23 districts. For the 2012 year, the data is presented in two tables to reflect the changes in districts during the year.

Geographical Mapping

Currently, HRM's mapping system (ExploreHRM) includes various assets including those included in the recreation inventory. Residents, Councillors and staff are able to map assets via respective data layers within ExploreHRM. This various inventory information for the most part is reflective in the Municipality's GIS system, however, various key word searches can produce different and varying reports. Staff are continually reviewing the data sets and correcting any discrepancies to improve the quality of the mapping available.

Regional Council's motion requested that the information be presented geographically if possible. Updated district maps with the inventoried recreational facilities have been created but due to the size of the documents, they have not been attached to this report but can be viewed and printed from HRM's website at <http://www.halifax.ca/rec/parks/index.html>.

FINANCIAL IMPLICATIONS

There are no financial implications noted at this time.

COMMUNITY ENGAGEMENT

This report deals with an administrative matter and, as such, public consultation was not undertaken.

ENVIRONMENTAL IMPLICATIONS

None identified.
